

## Acupuncture for Infertility

The conditions can be treated in combination and singularly as well.

For a fertility related disorder & helping couples conceive and carry through to term. We can significantly increase your chances of conception if your infertility is due to:

- Amenorrhea
- Endometriosis
- Irregular and Anovulatory Menstrual Cycles
- Luteal Phase Defect LPD
- Pelvic Inflammatory Disease PID
- Premature Ovarian Failure POF
- Polycystic Ovarian Syndrome PCOS
- Stress
- Poor Egg Quality
- Thin and Unresponsive Endometrium
- Cervical / Uterine Factors
- Immunological Factors
- Fallopian Tube Factors
- Ovulation Factors

Acupuncture is able to increase the chances of pregnancy through natural conception, IVF, IUI, and other ARTs because it has been clinically shown to:

- Regulate and stabilize hormone levels
- Help produce more follicles
- Increase blood flow to the uterus and ovaries by lowering impedance
- Thicken the endometrial lining
- Reduce the chance of miscarriage
- Strengthen the immune system and the overall health of the body
- Reduce stress
- Absorb nutrients and maintain ideal weight
- Facilitate relaxation
- Improve the quality of sleep
- Have NO side effects - does not introduce toxicity to you and your baby

### Quick Facts:

We have helped many couples conceive and carry through to term.

Acupuncture has been shown to increase conception rates and decrease miscarriage rates.
